FILTRI ABITACOLO / CABIN FILTERS

MEDIA FILTRANTE IN FIBRA SINTETICA

Media filtrante in fibra sintetica ad alta efficienza di filtrazione con struttura progressiva delle fibre.

Ciò significa che seguendo il senso di avanzamento dell'aria queste diminuiscono di dimensione e aumentano di densità e concentrazione. E' così garantita una reale azione di filtrazione in profondità ed un elevato immagazzinamento polveri, garantendo contemporaneamente una buona permeabilità dell'aria.

SYNTHETIC FIBER FILTRATION MEDIA

Synthetic fiber media filtration with high efficiency filtration and progressive structure of the fibers. This means that following the advance direction of the air the fibers diminished in size and increase in density and concentration. It 's ensures a real action of depth filtration and a high dust storage, while ensuring a good air permeability.

MEDIA FILTRANTE MULTISTRATO FIBRA /CARBONI

I filtri abitacolo combinati con carboni attivi TECNECO hanno le stesse caratteristiche e funzionalità dei filtri particellari ma in più sono dotati di uno strato di carboni attivi in grado di assorbire e ridurre cattivi odori e gas pericolosi per la salute del conducente e dei passeggeri.

FIBER/CARBON MULTILAYER FILTRATION MEDIA

TECNECO cabin air filters combined with active carbon have the same features and functionality of the particulate filters but most are equipped with a layer of activated carbon that absorb odors and dangerous gases for the health of the driver and passengers.

CORPORATE

SOLUZIONI INTELLIGENTI NELLA FILTRAZIONE

TECNECO progetta, produce e commercializza filtri aria, filtri olio, filtri carburante e filtri abitacolo per automobili, veicoli commerciali leggeri, mezzi agricoli e industriali.

Il nostro core business è l'Aftermarket Indipendente (IAM), settore che attrae il 70% del volume di affari annuo con una percentuale del 55% in Italia e del 45% all'esportazione. Il 30% della produzione è destinato al settore Industrial che comprende la produzione conto terzi per altri players nel campo della filtrazione automotiva e la produzione per il settore del Ricambio Originale (OES) e del Primo Impianto (OEM).

Il nostro impegno è offrire prodotti di qualità, essere competitivi ed affidabili, operare in sinergia con i nostri clienti che consideriamo prima di tutto nostri partners.

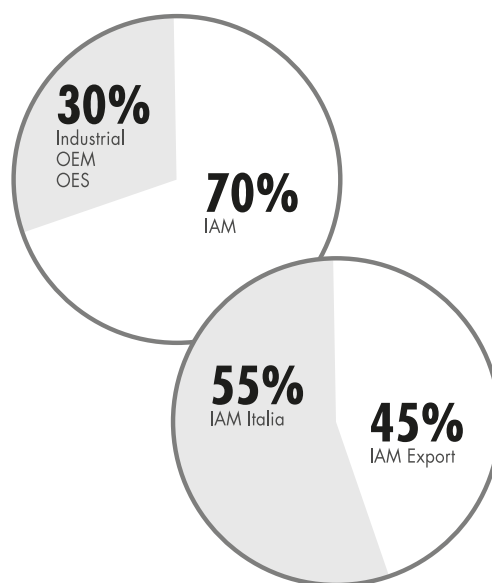

CORPORATE

SMART SOLUTIONS IN FILTRATION

TECNECO designs, manufactures and markets air filters, oil filters, fuel filters and cabin air filters for passenger cars, light commercial vehicles, agricultural and industrial vehicles.

Our core business is the Independent Aftermarket (IAM), a sector that attracts 70% of the annual turnover at a rate of 55% in Italy and 45% for exportation. The 30% of the production is directed to the industrial sector which includes contract manufacturing for other players in the field of filtration and the production for the Original Equipment Spareparts sector (OES) and Original Equipment Mounted sector (OEM).

Our commitment is to offer quality products, to be competitive and reliable, to work in synergy with our clients that we consider first of all our partners.

PRODOTTI

FILTRI ARIA, FILTRI OLIO, FILTRI CARBURANTE PER MOTORI A COMBUSTIONE E FILTRI ARIA ABITACOLO

La gamma prodotti TECNECO comprende filtri aria radiali, pannello e industriali, filtri olio spin-on, ecologici e immersione, filtri carburante in metallo, in linea, immersione e ecologici, filtri abitacolo in fibra e combinati con carboni attivi.

Tutti i nostri prodotti sono realizzati con l'impiego di materiali conformi e specifici e con l'utilizzo di impianti di produzione veloci, versatili ed affidabili.

FILTRI ARIA

- Radiali
- Pannello
- Industriali

AIR FILTERS

- Radial
- Panel
- Industrial

PRODUCTS

AIR FILTERS, OIL FILTERS, FUEL FILTERS FOR INTERNAL COMBUSTION ENGINES AND CABIN AIR FILTERS

TECNECO product range includes radial, panel and industrial air filters, spin-on and ecological oil filters, metal, in-line and ecological fuel filters, fiber and activated carbon combi cabin air filters.

All our products are manufactured with compliant and specific materials and using fast, versatile and reliable production machinaries.

FILTRI OLIO

- Spin-on
- Ecologici
- Immersione

OIL FILTERS

- Spin-on
- Ecological
- Refil

FILTRI CARB.TE

- In Metallo
- In Linea
- Immersione
- Ecologici

FUEL FILTERS

- Metal
- In-line

TECNOLOGIE

TECNOLOGIE PRODUTTIVE AVANZATE ED AFFIDABILI ALLA BASE DI PRODOTTI DI QUALITÀ CHE CONIUGANO FUNZIONALITÀ E COSTI

TECNECO dispone di tecnologie produttive avanzate ed affidabili che ci permettono di realizzare prodotti di qualità e contenere tempi e costi di produzione per essere competitivi in un mercato sempre più esigente.

Il 90% delle lavorazioni necessarie per produrre un filtro aria, olio o carburante, sono eseguite all'interno dei nostri stabilimenti, iniziando con la produzione degli elementi filtranti e lo stampaggio di componenti metallici e poliuretanici, passando per le fasi di assemblaggio fino ad arrivare al controllo finale di ogni prodotto finito.

Parte fondamentale del nostro processo produttivo è il controllo costante di ogni particolare. Siamo attrezzati con sistemi di collaudo in linea che verificano il 100% dei filtri prodotti e abbiamo al nostro interno un laboratorio dove vengono eseguiti controlli sui materiali in entrata e test funzionali sui prodotti finiti.

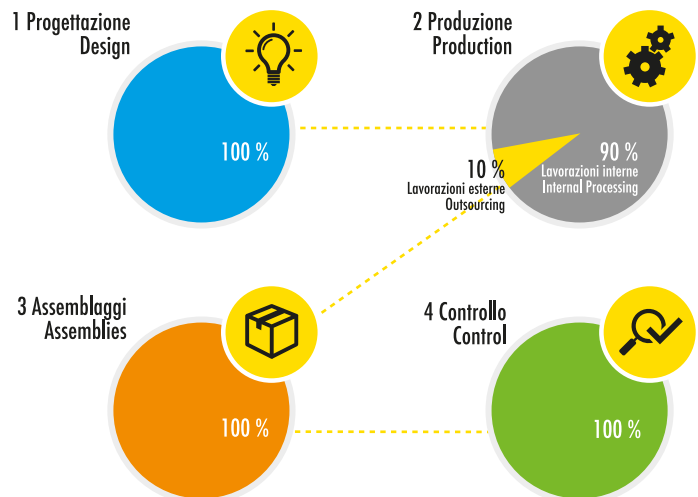

TECHNOLOGY

ADVANCED AND RELIABLE PRODUCTION TECHNOLOGIES AT THE BASE OF QUALITY PRODUCTS THAT COMBINE FUNCTIONALITY AND COST

TECNECO has advanced and reliable production technologies that allow us to produce quality products and reduce time and cost of production in order to be competitive in an increasingly demanding market.

The 90% of the necessary operations to produce an air, oil or fuel filter are performed within our plant, starting with the production of filter elements and the molding of metal components and polyurethane, passing through the stages of assembly and ending with the final check of each finished product.

A fundamental part of our manufacturing process is the constant control of every detail. We are equipped with in-line testing systems that verify 100% of the filters produced and we have a laboratory where checks are performed on incoming materials and functional tests on finished products.

STABILIMENTI

DUE STABILIMENTI PRODUTTIVI IN ITALIA STRUTTURATI SECONDO UNA MODERNA ORGANIZZAZIONE DEL LAVORO

TECNECO opera in due stabilimenti produttivi situati a Collepasso in provincia di Lecce.

I due stabilimenti sono strutturati secondo una moderna ed efficiente organizzazione del lavoro, dotati di impianti di produzione versatili ed affidabili e gestiti secondo un sistema di gestione della qualità certificato sulla base della norma ISO 9001:08 dall'ente TÜV.

PLANTS

TWO PRODUCTION PLANTS IN ITALY STRUCTURED WITH A MODERN ORGANIZATION OF THE WORK

TECNECO operates in two production plants located in Collepasso in the province of Lecce.

The two plants are designed in a modern and efficient work organization, with versatile and reliable production facilities which are managed following a quality management system certified according to the regulation ISO 9001:08 by TÜV.

STABILIMENTO PRODUZIONE FILTRI ARIA E MAGAZZINO CENTRALE LOGISTICA AIR FILTERS PRODUCTION PLANTS AND LOGISTIC WAREHOUSE

- Superficie totale 20.000 m²
- Superficie coperta 4.500 m²
- Una linea produzione filtri aria radiali
- Due linee produzione filtri aria pannello
- Magazzino centrale logistica

- Total area 20.000 m²
- Covered area 4.500 m²
- One production line of radial air filters
- Two production lines of panel air filters
- Logistic warehouse

STABILIMENTO PRODUZIONE FILTRI OLIO E FILTRI CARBURANTE OIL AND FUEL FILTERS PRODUCTION PLANTS

- Superficie totale 11.000 m²
- Superficie coperta 4.000 m²
- Una linea produzione filtri olio e filtri carburante spin-on
- Una linea produzione filtri olio e filtri carburante ecologici
- Un laboratorio controlli e test su materiali in entrata e prodotti finiti

- Total area 11.000 m²
- Covered area 4.000 m²
- One production line of oil and fuel spin-on filters
- One production line of oil and fuel ecological filters
- One laboratory for checks on incoming materials and finished products

CERTIFICAZIONI

Stabilimenti di produzione certificati secondo la norma UNI EN ISO 9001:2008

Campi di applicazione delle Certificazioni:

"PROGETTAZIONE E FABBRICAZIONE DI FILTRI ARIA PER MOTORI A COMBUSTIONE INTERNA"

"PROGETTAZIONE E FABBRICAZIONE DI FILTRI OLIO, FILTRI CARBURANTE PER MOTORI A COMBUSTIONE INTERNA"

CERTIFICATIONS

Production plants awarded by Management System Quality Certification UNI EN ISO 9001:2008

Certification is valid for the following products range:

"DESIGN AND MANUFACTURE OF AIR FILTERS FOR INTERNAL COMBUSTION ENGINES"

"DESIGN AND MANUFACTURE OF OIL FILTERS, FUEL FILTERS FOR INTERNAL COMBUSTION ENGINES"

Ultra-thin III
Filtration Technology

UNA PROTEZIONE INDISPENSABILE CONTRO LE POLVERI SOTTILI

FILTRI PARTICELLARI E COMBINATI CON CARBONI ATTIVI AD ALTA EFFICIENZA DI FILTRAZIONE

I filtri aria abitacolo particellari e combinati con carboni attivi TECNECO sono prodotti con l'impiego di media filtranti ad alta efficienza di filtrazione e con disposizione progressiva delle fibre, dallo strato di pre-filtrazione iniziale allo strato finale di copertura e protezione.

Struttura progressiva delle fibre significa che seguendo il senso di avanzamento dell'aria queste diminuiscono in dimensione e aumentano in densità e concentrazione. Viene così garantita una reale azione di filtrazione in profondità e un elevato immagazzinamento polveri garantendo contemporaneamente una buona permeabilità all'aria.

FILTRI PARTICELLARI

I filtri aria particellari TECNECO sono una reale ed affidabile protezione contro le particelle fini disperse nell'aria, le micropolveri fini respirabili, i pollini, le particelle da abrasione (freni - frizioni), le polveri stradali.

FILTRI COMBINATI CON CARBONI ATTIVI

I filtri aria abitacolo combinati con carboni attivi TECNECO hanno le stesse caratteristiche e proprietà dei filtri particellari ma in più sono muniti di uno strato di carboni attivi in grado di ridurre cattivi odori e gas pericolosi per la salute.

- Protezione da pollini, polveri sottili e ozono
- Eliminazione dei cattivi odori
- Visibilità chiara e nitida alla guida
- Protezione del sistema di riscaldamento e di aria condizionata dallo sporco

ASEPTIC BAG

Da sempre tutti i filtri abitacolo TECNECO, sia in fibra che combinati con carboni attivi, vengono conservati in un'apposita busta in nylon completamente asettica e poi scatola nel proprio pack in cartoncino. La scelta di conservare i filtri in una busta asettica e sigillata nasce dall'esigenza di fornire al mercato un prodotto che conservi nel tempo le sue qualità e caratteristiche, al fine di garantirne sempre una sua totale efficacia. Infatti, sia i filtri abitacolo in fibra che quelli combinati con carboni attivi, se non imbustati, perdono con il tempo le loro caratteristiche e funzionalità. I filtri abitacolo in fibra se non imbustati tendono a perdere col tempo la carica elettrostatica della fibra, che ha la funzione di trattenere le particelle inquinanti intercettate dal filtro.

La stessa cosa vale per i filtri combinati con i carboni attivi, che se non imbustati, rilasciano col passare del tempo i carboni attivi nell'ambiente, anche se non ancora installati sulla vettura.

FILTRI ABITACOLO IN BUSTA ASEPTICA PER GARANTIRNE QUALITÀ ED EFFICACIA

CABIN AIR FILTERS IN ASEPTIC BAG TO ENSURE QUALITY AND EFFECTIVENES

EVEN BETTER PROTECTION AGAINST FINE DUSTS

PARTICLE AND COMBI CABIN FILTERS WITH HIGH EFFICIENCY MEDIA'S

TECNECO particle and combi cabin filters consist of a multilayered filter medium. TECNECO filter media provides high arrestance, and is sandwiched by a pre-filter and a cover layer. The progressive structure, which means that fibre fineness and density increase towards the clean-air side. This ensures effective deep-bed filtration and even, maximised dust storage coupled with good air-permeability. The combi filter additionally features an adsorption layer made of activated carbon. TECNECO particle and combi filters achieve consistently high functional dependability even under the toughest of requirements.

THE PARTICLE FILTER

Reliable protection against fine dusts: thanks to optimised filter medias, Tecneco Filters particle filters provide the best state-of-the-art arrestance of respirable dusts, pollens, abraded particles and road dust.

THE COMBI FILTERS

In addition to the particle filters, it features a layer of activated carbon, enabling it to reduce unwanted odours and harmful gases. TECNECO combi filters provide a double function: health risks are minimised, driving comfort maximised.

- Protection against pollens, soot, fine dust
- Protection against unpleasant odors
- Enhanced visibility means more safety
- Protection of heating and ventilation systems against soiling, and thus extends their useful lifetimes

ASEPTIC BAG

Always all TECNECO cabin filters, both fiber and combined with activated carbon, are stored in a special nylon bag, completely aseptic and then boxed in cardboard pack. The choice to keep the filters in an aseptic and sealed bag stems from the need to provide to the market a product that retains over time its quality and characteristics, in order to always ensure its total effectiveness. In fact, both the cabin filters, fiber and combined with activated carbon, if not packed, lose over time their features and functionality. Fiber filters if not in bag, lose over time the electrostatic charge, which retains the contaminating particles intercepted by the filter. The carbon combi, if not packed, release the carbon in the environment, although not yet installed on the car.

PROTEZIONE, SICUREZZA ED ARIA PULITA PER GUIDATORE E PASSEGGERI

PROTEGGERE LA PROPRIA SALUTE CONTRO POLLINI E BATTERI, RESPIRARE ARIA PULITA, RIMUOVERE I CATTIVI ODORI

Il problema della qualità dell'aria in auto è oggi un argomento di discussione frequente ed indubbiamente di grande importanza. Come protezione efficace contro le sostanze nocive presenti nell'aria che respiriamo in auto, TECNECO offre due tipologie di filtri abitacolo: i filtri particellari e i filtri combinati.

FILTRI PARTICELLARI

I filtri particellari proteggono dalle polveri sottili, i pollini, la polvere stradale, le polveri da attrito e abrasione, la fuliggine, i batteri, le polveri industriali e altre polveri fini respirabili. Proteggono anche dai fumi di scarico dei veicoli con motore diesel che contengono particelle ultrafini e particelle carboniose di dimensioni inferiori a 2,5 micron di diametro. Le particelle di tali dimensioni difficilmente bloccabili dalle alte vie del nostro apparato respiratorio (come mucose delle cavità nasali e faringee e peli del naso) giungendo nei polmoni possono provocare vere e proprie infezioni polmonari e depositarvi sostanze tossiche di vario genere.

Queste sostanze inquinanti tendono a depositarsi in modo particolare nelle vie respiratorie più profonde e nei polmoni e sono causa di malattie respiratorie, malattie cardiovascolari ed asma. Soprattutto le persone che soffrono di allergie di tipo respiratorio, sono particolarmente a rischio se nell'abitacolo riescono a penetrare pollini nella stagione primaverile della fioritura. Irritazioni agli occhi, naso che cola, difficoltà respiratorie e attacchi di starnuti, riducono fortemente la concentrazione mentre si è alla guida dell'auto, aumentando il pericolo di incidenti stradali.

FILTRI COMBINATI CON CARBONI ATTIVI

I filtri abitacolo combinati con carboni attivi proteggono guidatore e passeggeri dalle stesse sostanze inquinanti contro cui agiscono i filtri particellari, ma in più grazie allo strato di carbone attivo di cui sono dotati, assorbono anche odori e gas, come per esempio benzene e ozono. Come le micropolveri, anche i gas, che hanno dimensioni di gran lunga inferiori, raggiungono le parti profonde del nostro apparato respiratorio. L'ozono, gas pericoloso e irritante, può causare reazioni come emicrania, tosse e stati di lacrimazione continua.

POTECTION, SAFETY AND CLEAN AIR FOR DRIVER AND PASSANGERS

PROTECT YOUR HELTH AGAINST POLLEN AND BACTERIA, BREATH CLEAN AIR, REMOVE UNPLEASANT ODORS

Pure clean air in cars has evolved into an important issue. As effective protection against pollutants, most particularly fine dusts, TECNECO is here offering two types of filter, each with synthetic fibre technology: particle and combi filters.

PARTICLE FILTERS

Particle filters protect against fine dusts, and also against pollens, road dust, abraded particles, soot, bacteria, industrial dusts and other respirable ultra-fine particles. Exhaust fumes from diesel vehicles contain fine dust and soot particles, smaller than 2,5 micrometers. This size of particle will not always be arrested by the mucus membranes in the nasal and pharyngeal cavities or by the nasal hairs. These particles are particularly health-hazardous, because they are able to trigger inflammations in the lung, and also transport toxic substances. Most of them are deposited in the lower respiratory tracts and the lungs. They are seen as a cause of respiratory deseases, cardio-vascular complaints and ashma. Carcinogenic effects are also attributed to them.

If pollens get inside the car unfiltered, allergy-sufferers are particularly at risk. Streaming eyes, dripping noses, shortness of breath or sneezing attacks reduce concentration levels and increase the accident risk.

COMBI FILTERS

The combi filters provides protection against the same pollutants as the particle filter - and that's not all it can do. Using a layer of activated carbon, it additionally adsorbs odours and gases, like benzene or ozone. Besides the small solid particles, the gases, smaller by a factor of ten milion, also penetrate as far as the deeper regions of the lung. The dangerous irritant gas ozone can cause reactions like headaches, coughing or streaming eyes. The activated-carbon layer in the TECNECO combi filters will break up to 99 percent of the ozone.
