Filtri abitacolo antibatterici multistrato Multilayer antibacterial cabin filters

FILTRO ABITACOLO ANTIBATTERICO MULTISTRATO

Oggi il filtro abitacolo ha una funzione importantissima perché direttamente collegato alla salute di guidatore e passeggeri. Qualità e affidabilità dei materiali utilizzati e performance di filtrazione sono alla base di un prodotto adeguato ed efficiente.

Da tempo **TECNECO** ha in gamma due diverse tipologie di filtri abitacolo, in **Fibra** capaci di bloccare e trattenere le particelle inquinanti disperse nell'aria e **Combinati con Carboni Attivi** che oltre a bloccare e trattenere gli inquinanti, grazie al loro strato di carboni attivi, sono in grado di assorbire gas e odori pericolosi per la salute di guidatore e passeggeri.

Da oggi **TECNECO** allarga la gamma con una nuova tipologia di filtri abitacolo, quelli **Antibatterici**, denominati **ADPlus**, capaci di bloccare le particelle inquinanti, assorbire gas e odori, contrastare la formazione di batteri e allergeni.

I filtri abitacolo antibatterici **TECNECO ADPlus** sono prodotti utilizzando uno speciale media filtrante multistrato **Fibra/Carboni-Attivi/Fibra-Antimicrobica** con azione filtrante a 3 stadi, 1° blocco particelle inquinanti - 2° assorbimento di gas e odori - 3° contrasto alla formazione di batteri e allergeni.

Nello specifico è lo strato **Biofunzionale in Fibra-Antimicrobica** che additivato con polifenoli naturali, cattura gli allergeni liberi e sottrae ai batteri e alle muffe il cibo necessario per la loro proliferazione, svolgendo così la sua funzione antibatterica.

ADPlus

MULTILAYER ANTIBACTERIAL CABIN FILTER

Today cabin filter has a very important function because directly connected to driver's and passengers health. Quality and reliability of materials used together with filtration performance are the basis for an appropriate and efficient product.

TECNECO has at range two different types of cabin air filters, **Fiber** one capable of blocking and retaining the polluting particles dispersed in the air and **Combined with Active Carbon** that in addition are able to absorb odors and gases dangerous for the health of driver and passengers.

From today **TECNECO** widens the range with a new type of cabin air filters, **Antibacterials** one, called **ADPlus**, able to stop the polluting particles, absorb gases and odors, prevent the formation of bacteria and allergens.

TECNECO ADPlus antibacterial cabin filters are manufactured using a special multi-layer filter media **Fiber/Active Carbon/Antimicrobial Fiber** with 3 stages cabin air filtration, 1° captures polluting particles - 2° absorbs gases and odors - 3° prevents formation of bacteria.

Specifically is the **antimicrobial fiber biofunctional layer** that added with natural polyphenols is catching the free allergens and deprives to bacteria and mold from food necessary for their proliferation, thus playing its antibacterial function.
